

Yash Rathore

SOFTWARE ENGINEER | BACKEND, FULL-STACK & AI SYSTEMS

Toronto, ON | Canadian Citizen | rathore.yash6@yahoo.com | (647) 832-1596 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software engineer with 1+ year of professional experience delivering secure multi-tenant APIs, cloud services, and responsive web applications. Built 35+ production REST/proxy endpoints and PostgreSQL-backed authorization and usage systems across Python/FastAPI, TypeScript/React, Java, C#/.NET, AWS/GCP, Docker, and CI/CD; experienced in AI model evaluation, technical leadership, and end-to-end feature delivery.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C#, C++, SQL, HTML/CSS

Backend & Architecture: FastAPI, Django, Spring Boot, ASP.NET Core/.NET 10, NestJS, REST APIs, OAuth2/JWT, RBAC

Frontend & Data: React, Next.js, Angular, Vue/Nuxt, MUI, PostgreSQL, SQL Server, Supabase, MySQL, SQLite, Firebase, Redis

Cloud, DevOps & Quality: AWS, GCP Cloud Run, Docker, Terraform, GitHub Actions, CI/CD, Git, Postman, pytest, JUnit, xUnit, Playwright, Pact, k6, OpenTelemetry

AI & Developer Tools: LLM evaluation, prompt engineering, Jupyter

PROFESSIONAL EXPERIENCE

Full Stack Developer | Deputy Team Lead | Vosyn Inc.

Mar 2025 - Present

- Coordinate sprint planning, onboarding, code reviews, and technical documentation for Vosyn Connect, a developer-facing multilingual AI platform.
- Architected multi-tenant FastAPI services and SQLAlchemy/PostgreSQL schemas for projects, organizations, users, analytics, RBAC, API keys, quotas, and usage tracking.
- Built 35+ REST and proxy endpoints connecting external developers to internal ML services; implemented JWT-secured flows, validation, rate limiting, and structured error handling.
- Integrated Next.js and MUI interfaces with backend services for project onboarding, analytics, API exploration, embeds, and authenticated workflows.
- Improved Cloud Run deployment performance by 15% through container tuning and automated CI/CD; diagnosed cross-service failures using logs, Postman, and integration tests.
- Delivered usage-insights, embed, and developer-forum capabilities with pagination, bookmarks, quotas, and rate-limit metadata across frontend and backend services.
- Partnered with product, frontend, and ML teams to translate requirements into scoped features and production releases.

AI Trainer | Outlier AI

Oct 2024 - May 2025

- Created and evaluated 100+ Java, Python, and C++ programming tasks, assessing code generation, reasoning, correctness, efficiency, and edge-case handling.
- Wrote detailed scoring rationales, ranked model responses, reproduced defects, and recommended fixes to improve training-data quality and reliability.
- Designed adversarial OCR, chart, and diagram evaluations and curated image datasets with 80%+ accuracy; documented recurring model failure patterns.

SELECTED PROJECTS

PaymentOps Orchestrator | TypeScript, NestJS, SQL Server, Redis, Kafka, AWS, Terraform

2026 - Present

- Designed and built a production-style multi-tenant payment platform with RBAC, JWT/API-key authentication, idempotent payouts, append-only ledger entries, approval gates, signed webhooks, and settlement reconciliation.
- Implemented outbox-driven processing with Redpanda, Redis/BullMQ workers, retries and dead-letter recovery, OpenTelemetry, Playwright/Pact/k6 tests, GitHub Actions, and AWS ECS/Fargate infrastructure.

LeadRecovery | C#, .NET 10, ASP.NET Core, EF Core, PostgreSQL, Docker

2026 - Present

- Developing a modular-monolith lead-recovery platform with API and worker hosts, tenant-isolated domain models, EF Core migrations, health checks, and deterministic state rules.
- Added xUnit/Testcontainers integration tests, Docker Compose orchestration, project-boundary tests, and backend CI quality gates for a reliable, extensible foundation.

Spending Analysis Dashboard | Python, Django, Angular, TypeScript, PostgreSQL

Aug 2024

- Built a responsive finance dashboard with REST APIs, dynamic filters, and monthly/category visualizations; improved API performance by 10% and user engagement by 15%.
- Designed reusable Angular components and PostgreSQL-backed budget/category analytics, improving maintainability and responsiveness across desktop and mobile views.

Android Anti-Theft App | Java, Firebase, XML, GPS

Sep 2023

- Developed a secure Android application with GPS tracking, Firebase authentication, and real-time theft alerts; reduced unauthorized access by 40% through event-driven Cloud Functions.

EDUCATION

B.Eng. (Honours), Software Engineering | Lassonde School of Engineering, York University

Jun 2024

- Relevant coursework: Data Structures and Algorithms, Object-Oriented Programming, Databases, Software Architecture, Web Development, Testing, and Cloud Computing.
